Appendix 1: Feedback on Habitat Regulation Assessment (HRA) Report consultation (Reg16)

Appendix 2: Screening matrix for housing site options

1.0 Introduction

- 1.1 To ensure that the requirements of the Habitats Directive and Regulations are met, it is necessary to consider the proposed alternative sites through the HRA process to the Burghill NDP. Between the two Regulation 16 consultations, draft NDP has not been modified but additional work has been undertaken on the site assessment work which accompanies the NDP. This is in light of concerns raised during the submission consultation in June 2016, regarding the deliverability of the preferred sites within the NDP.
- 1.2 The purpose of this further HRA Addendum Report is to detail the findings of the screening of the 46 alternative sites and consider if they significantly affect the conclusions of the earlier HRA Reports (December 2015 and June 2016).
- 1.3 In total 7 of the 41 sites have been chosen as preferred and allocated within the June 2016 version of the plan. Since then, two sites have been removed from the resubmission version due to planning commitments which have been granted since 2016.

2.0 Screening of alternative sites options to the NDP

- 2.1 As required under Regulation 102 of the Habitats Regulations 2010 a Screening Assessment has been undertaken, in order to identify the 'likely significant effects' of an NDP. Accordingly, a screening matrix was prepared and this determined the extent to which any of the policies within the Burghill NDP would be likely to have a significant effect on the catchment of the River Wye SAC.
- 2.2 The findings of the screening matrix can be found in Appendices 1 and 2 of that report.
- 2.3 The screening matrix took the approach of screening each policy, objective and site allocation individually, which is consistent with current guidance. The results from the HRA reports for the Herefordshire Local Plan (Core Strategy) were also taken into consideration.
- 2.4 None of the Burghill NDP objectives and policies (January 2016 and June 2016) were concluded to be likely to have a significant effect on the European sites. This conclusion is based on assumptions and information contained within the Burghill NDP, the Herefordshire Local Plan (Core Strategy) and the HRA for the Local Plan (Core Strategy).
- 2.5 In many cases this is because the policy itself would not result in development, i.e., it related instead to criteria for development. In a number of cases the policies also included measures to help support the natural environment, including biodiversity and therefore no significant effect conclusion could be reached. In addition, these policies have the potential to mitigate some of the possible adverse effects arising from other policies.
- 2.6 A total of 46 sites were considered within the site assessment report, of which 23 were discounted due to their location being contrary to the Core Strategy. This left a possible 26 sites to be assessed. 7 of these were chosen as the preferred options for inclusion within the plan to meet the level of growth proposed within the Core Strategy.
- 2.6 Dwr Cymru Welsh Water (DCWW) has stated for the Core Strategy that there is sufficient existing permitted headroom in the Eign Sewerage treatment word to continue to treat water for the amount of housing provided for in the Core Strategy policies. The Nutrient Management Plan for the River Wye SAC will ensure that development permits would not be likely to have a significant effect upon the River Wye SAC.
- 2.7 It is unlikely that the Burghill Neighbourhood Plan will have any in-combination effects with any Plans from neighbouring parish council due to the level of growth proposed is of the same that is proposed for the Hereford Housing Market Area in the Herefordshire Core Strategy
- 2.8 Therefore it was concluded that the **Burghill NDP will not have a likely significant effect on the River Wye SAC.**

3.0 Summary of main findings

- 3.1 The resubmission NDP has not changed significantly since the last submission consultation. Two sites have been removed from NDP in Lower Burlton as an alternative site now has planning permission for 50 dwellings in the location. The settlement boundary has been altered in Lower Burlton and Burghill to take account of extant planning permissions granted since the last regulation 16 consultation.
- 3.2 A total of 23 sites were assessed as part of the HRA, all of these were seen as not likely to have a significant effect on the hydrological catchment of the River Wye SAC.
- 3.3 The revised NDP is therefore unlikely to result in significant effects on the European sites, a conclusion of which is based on assumptions and information contained within the Burghill NDP, the Herefordshire Local Plan (Core Strategy) and the HRA for the Local Plan (Core Strategy).

4.0 Conclusion

- 4.1 With reference to section 3 above, there have only been minor amendments made to the plan to reflect extant planning permissions granted since the previous submission consultation. The text and the direct of the plan have not been altered, this additional period has been to consolidate the evidence base with regards to the delivery of the preferred allocated sites.
- 4.2 Therefore the earlier conclusion that the **Burghill NDP will not have a likely significant effect on the River Wye SAC** remains valid.

5.0 Next steps

- 5.1 This further Addendum Report will be published alongside both the resubmission NDP and earlier HRA Reports for consultation. Any changes to the plan that arise from this consultation will be subject to further screening, in order to consider their impact on the protected site.

Appendix 1

Consultation date: 13 July to 24 August 2016

Consultation title: Burghill Parish NDP Regulation 16

*N.B. This consultation feedback is **only** for comments received on the HRA of the Neighbourhood Development Plan*
