

Along the lengths of 30mph roads within the parish, in addition to repeater signs to remind vehicles of the speed limit it is proposed to introduce features across the carriageway.

The aim of these reminder features is to provide an additional visual and physical reminder of the speed limit.

The main elements of the reminder feature are;

- Buff coloured asphalt surfacing to visually indicate the feature.
- Kerbs across the road at each side of the feature with a 6mm upstand to create a nominal physical effect when driving over the feature.

These features are located at regular intervals along the lengths of road with the 30mph speed limit. They are located typically;

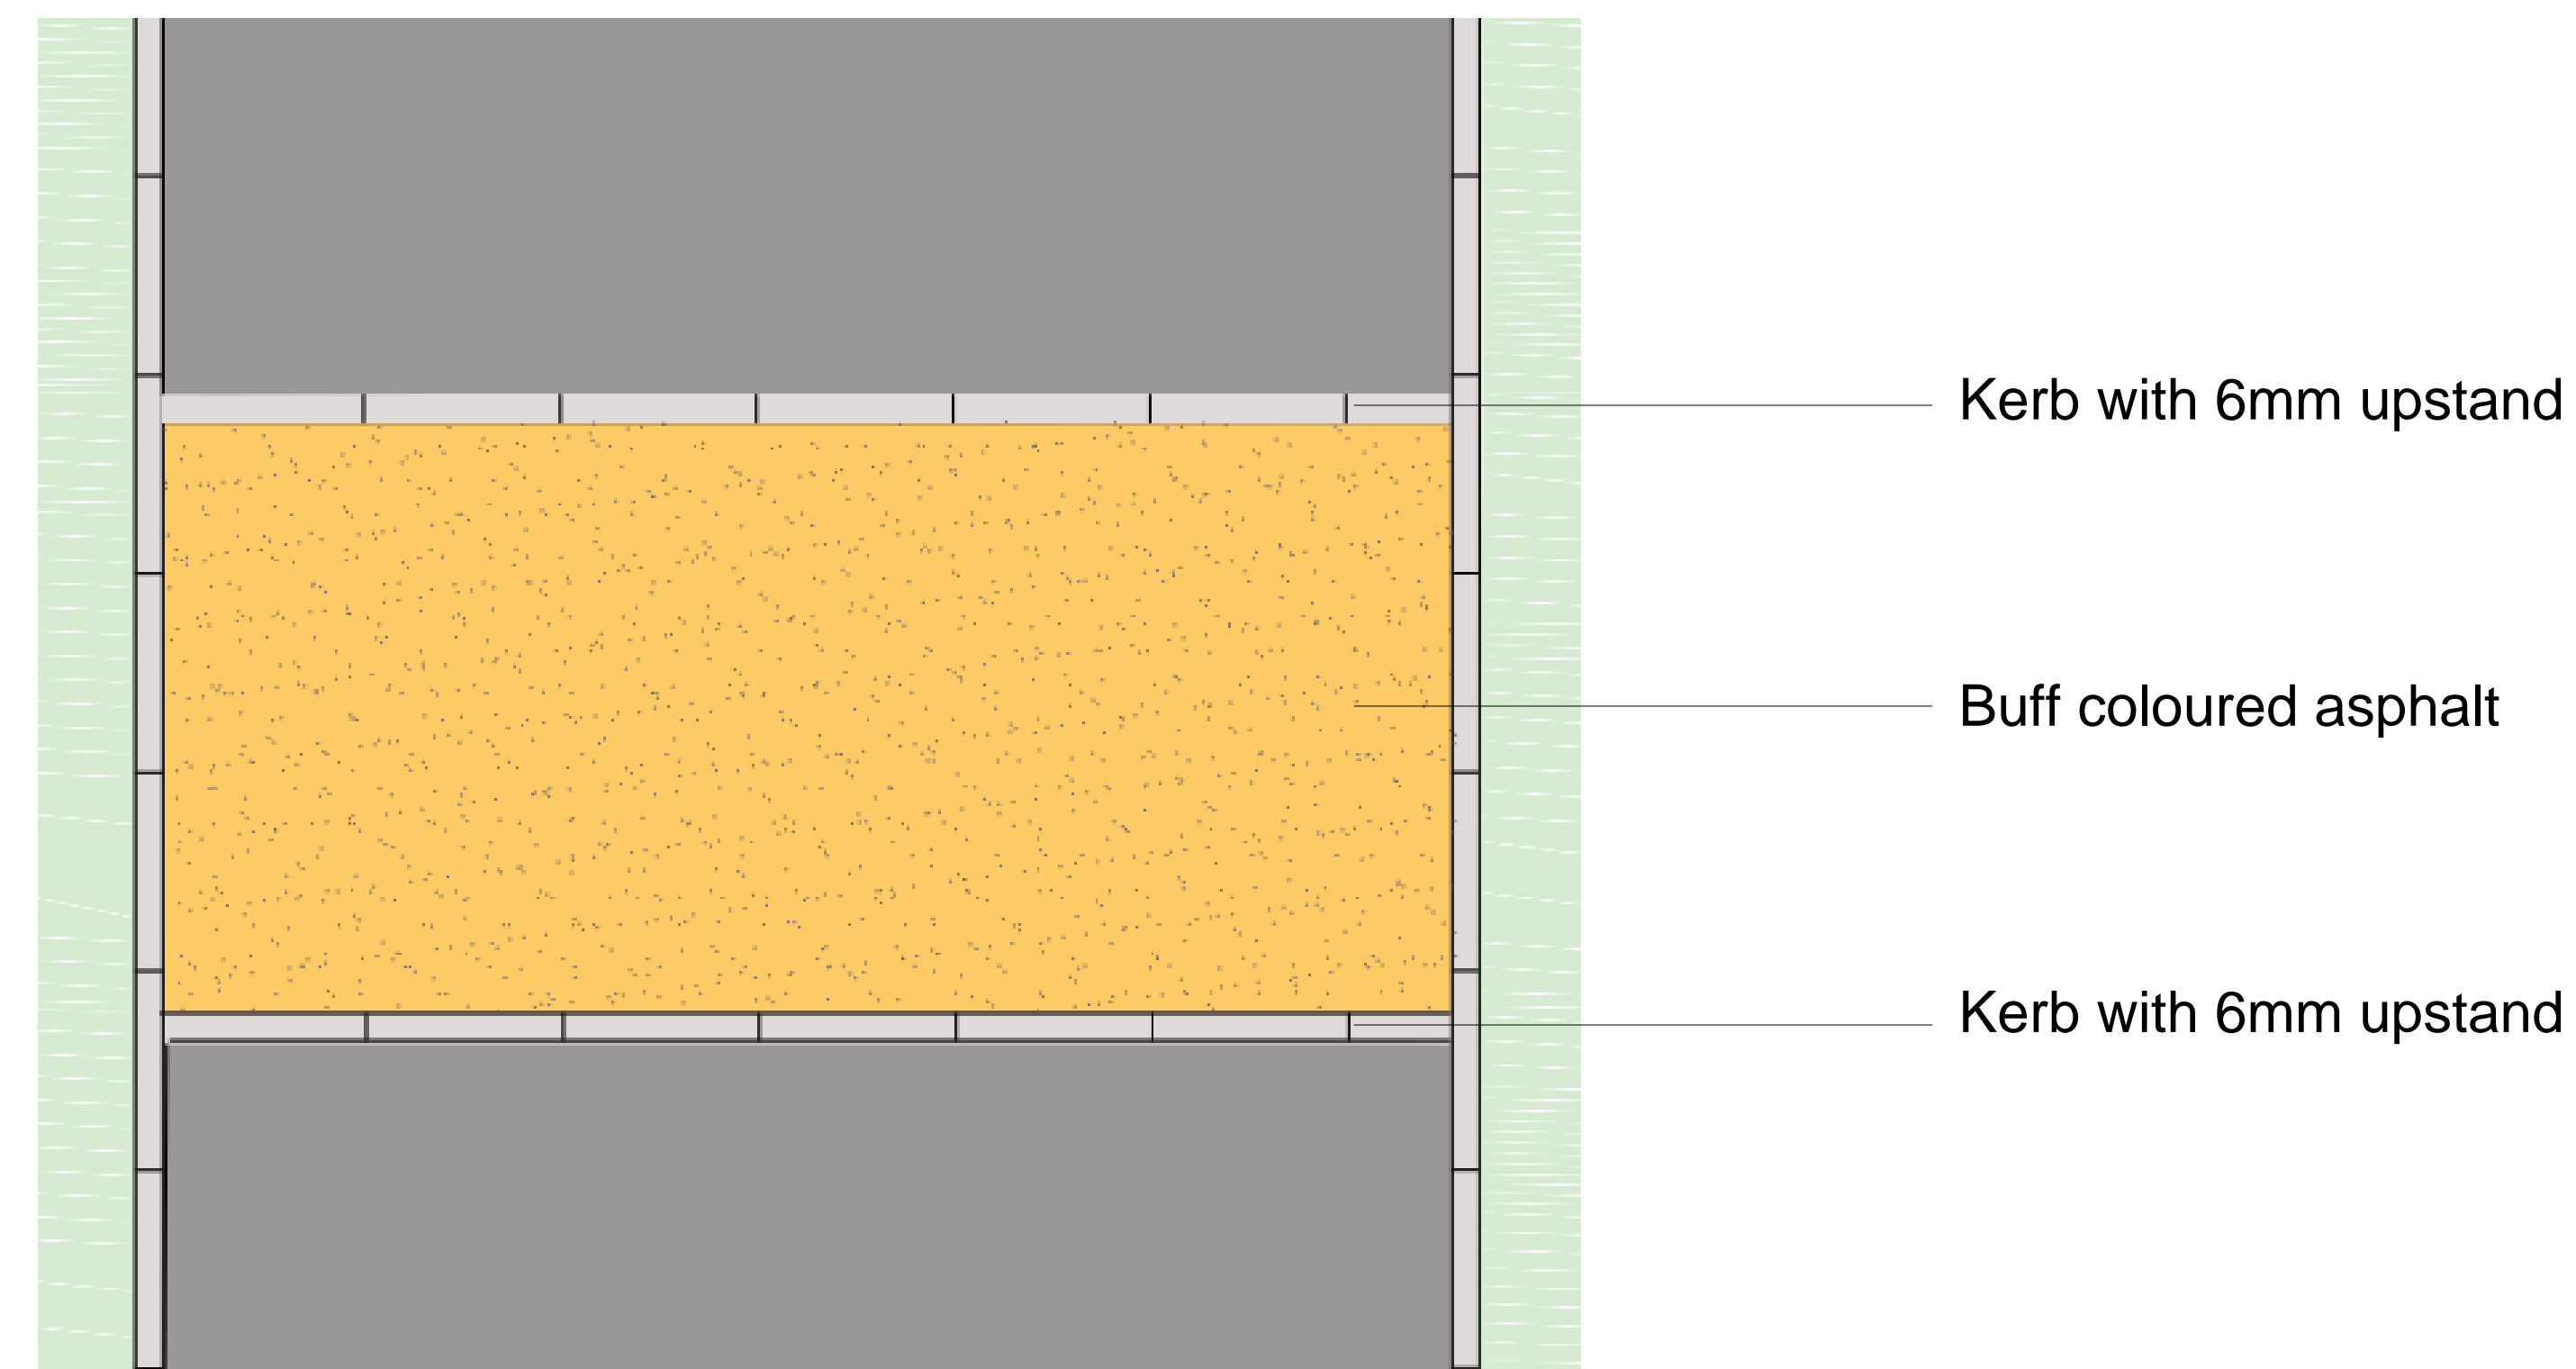

- At points where vehicles enter areas with houses
- Where there is an additional hazard such as a significant corner
- At the approach to junctions

Location of reminder feature at entrance to Shelwick

Location of reminder feature south of Lyde Cross
