

Herefordshire Play Facilities Strategy: Rural Action Plans

Appendix 5 Action Planning (October) 2011/2012: Rural Areas

The Action Plans are area based, split between urban and rural areas, to include Hereford City and the Market Towns and the Rural Hinterlands surrounding the urban areas.

The Action Plans have been developed to take account of the analysis of existing play provision and in particular the development of play areas to plug gaps and deliver a hierarchy of provision across the county for all ages. They will also demonstrate a flexible and responsive approach to shifting priorities, to take account of community involvement and deteriorating condition of an individual play area for example. Therefore whilst a priority rating has been given to each play area for future investment and development, the ratings will be reviewed annually to ensure that those areas requiring more urgent attention are recognised and equally those that have recently received investment are identified.

The priorities have last been updated October 2011.

In recognising that priorities can change and be influenced by a number of factors including local need, community support and timescales for securing funding, the priority list identified in each area (urban and rural) will need to develop a flexible, responsive approach to delivering individual schemes. Therefore they will not be time specific and where there are a number of competing projects for section 106 monies for example, projects which are “ready to go” will be given priority.

Developing new and existing provision will also be influenced by the Local Development Framework and anticipated growth of both the urban and rural areas. For rural areas which include the parishes around **Ledbury, Kington, Ross, Leominster, Bromyard, Golden Valley and Central Herefordshire** housing targets as identified in the Revised Preferred Option Target 2011 – 2031 are as follows:

Herefordshire Play Facilities Strategy: Rural Action Plans

	Revised Preferred Option Target 2011-2031	Annual rate Required 2011-2031
Rural Areas	5300	265

A list of wards and parishes for each rural area can be found at the start of each section.

Draft

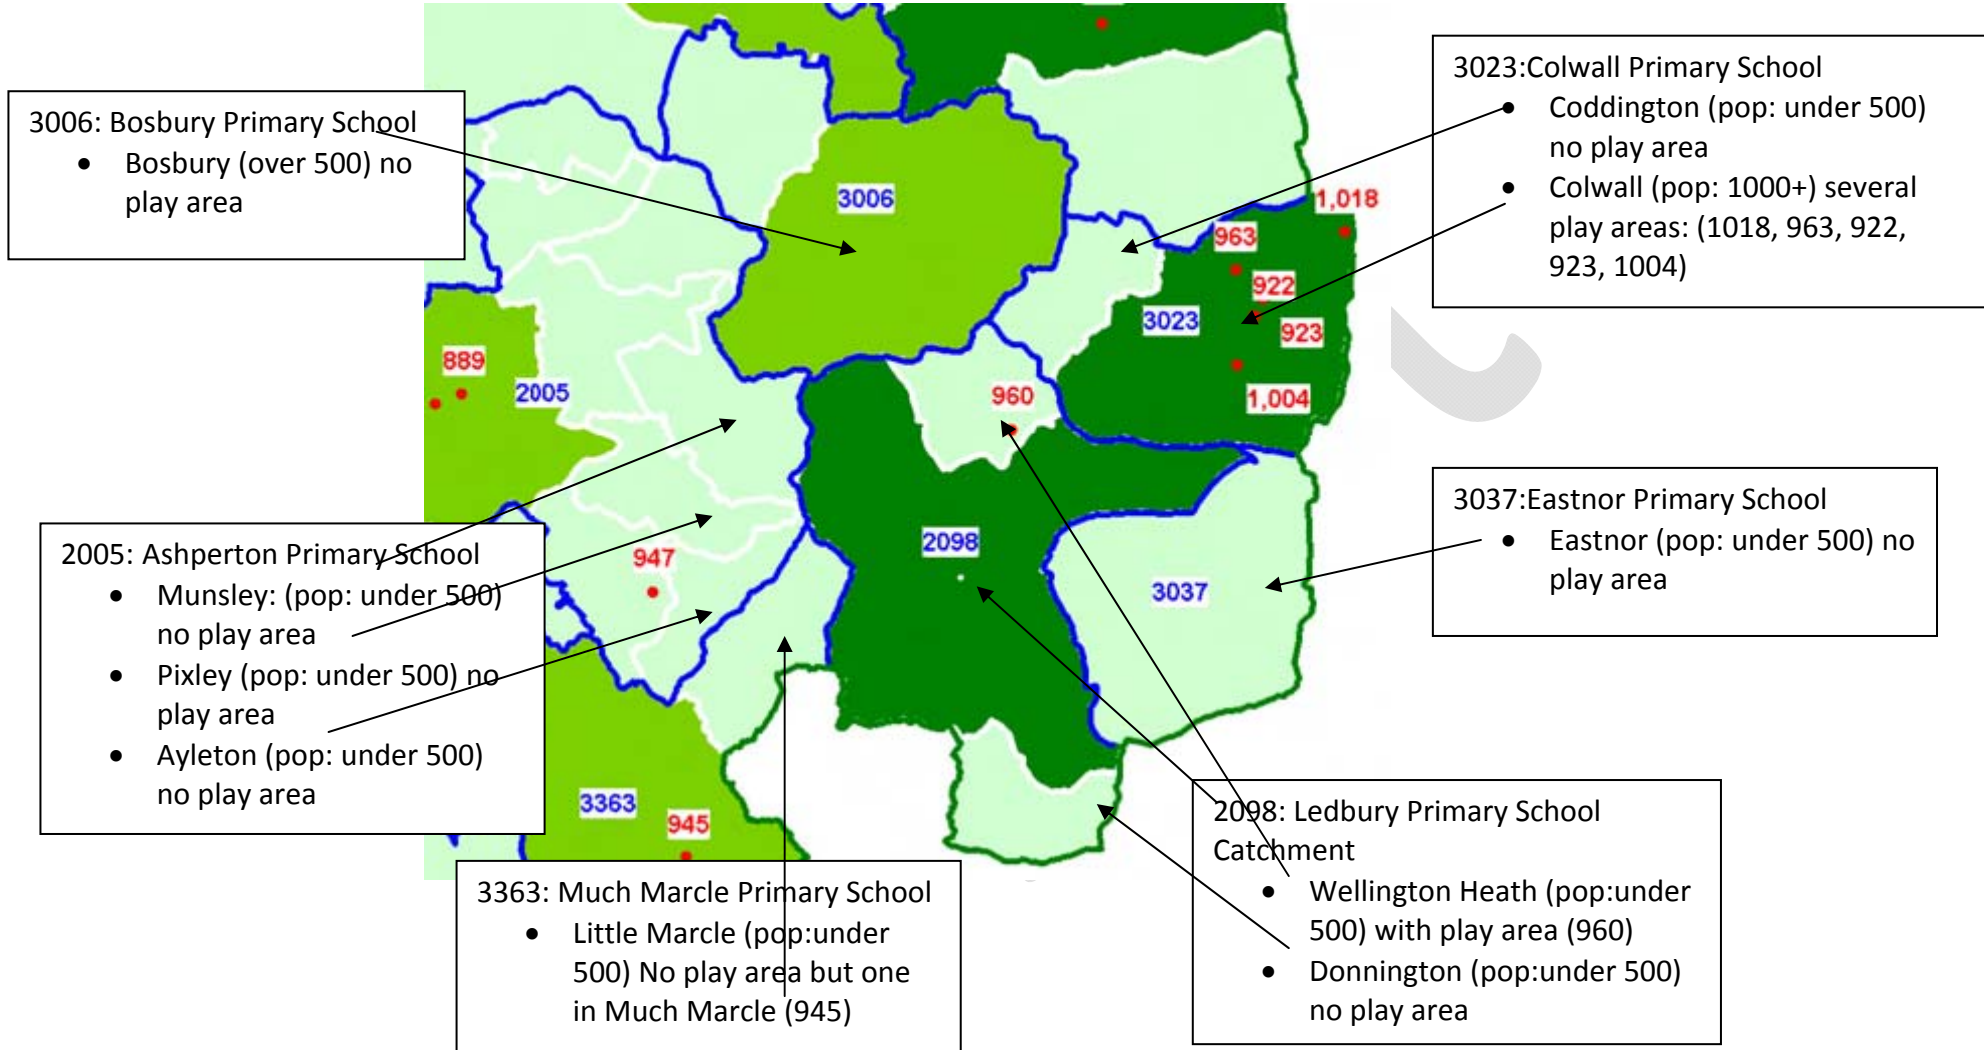

Herefordshire Play Facilities Strategy: Rural Action Plans

Ledbury Area:

In the rural areas the size of population, school catchments and the existence of other types of “green space” for informal play will all help to shape the future development of play areas.

Leominster Area:

In the rural areas the size of population, school catchments and the existence of other types of “green space” for informal play will all help to shape the future development of play areas. In this case there are a number of adjacent parishes of below 500 without play provision, which could benefit from good facilities in Leominster.
