

Name John Pudge

Q1. Do you agree that this (Oakfield Nash Lane) could be a suitable site for up to 4 additional residential traveller pitches?

No

Q1a. If no, please explain:

The site is situated  the way down a narrow lane a cul-de-sac. The increase of four families is out of proportion to the number of people living in this small community. The assessment appraisal has education and lack of public transport as only a minor negative surely these are greater than that. Climate Change 16.1 How can this be neutral if there at least four more families the effect on the Greenhouse emissions are bound to go up effecting this community surely a negative for this site.

Q1b. If you have any further comments on this site, please specify

The desk assessment states that there are two pitches (mobile homes) and a day room on the site at present. A site visit would be useful as the Parish Council and I think there are only one plus a day room. The planning for the second in 2012 has lapsed due to no material change to the site since then. Will the increase in future be four pitches or four pitches and this lapsed pitch. If so this will increase the families by 25%. .

Q2. Do you agree that this (Madley) could be a suitable site for up to 10 residential traveller pitches

Yes

Q2a. If no, please explain:

Q2b. If you have any further comments on this site, please specify

Herefordshire Council control this site and should therefore be more likely to know if it is able to absorb the extra pitches. They have a monitoring system in place.

Q3. 4. Do you have any other comments on the consultation that are not covered by these questions?

Many Parishes in Herefordshire that do not have the level of sites that Bosbury and Coddington Parish has these should be explored.
