- Main Rivers
- Flood Zone 2
- Flood Zone 3
- Area benefitting from the River Wye Hereford Flood
- Defence Scheme up to 0.5% (1 in 200) annual probability

The mapped extent of Flood Zone 2 and Flood Zone 3 replicate the EA Flood Map for Planning, with flood extents as downloaded from www.gov.uk in February 2017. Fluvial flood risk associated with smaller watercourses with a catchment of less than c.3 square kilometres may not be illustrated on these maps. The reader is advised to refer to the Map of Surface Water Flood Extents in North-West Hereford to understand the potential risks associated with these features.

 6xx70023685 - BBLPHCC1617 - SFRA MXDs\Appendix E Hereford Local Maps\Hereford North-West Maps\APPENDIX E2B Hereford NW Functional Floodplain_V2.mxd

- Main Rivers
- Flood Zone 3b - Urban or Defended
- Flood Zone 3b - Functional Floodplain

Flood Zone 3b is indicative only and indicates areas that may flood during the 1 in 20 (5%) annual probability event, however urban or defended areas are not usually classified as Functional Floodplain.

Areas identified to be urban and not considered to be floodplain are based on a review of OS mapping to illustrate indicative extents.

The EA's Area Benefiting from Flood Defences and the previous SFRA (2009) have been used to inform the Flood Zone 3b - urban or defended area.

Fluvial flood risk associated with smaller watercourses with a catchment of less than c.3 square kilometres may not be illustrated on these maps. The reader is advised to refer to the Map of Surface Water Flood Extents in North-West Hereford to understand the potential risks associated with these features.

- Main Rivers
- Indicative Future Flood Zone 3

In line with current guidance outlined in the Herefordshire Level 1 SFRA the current Flood Zone 2 extent has been used to indicate a 70% increase in peak river flow and the future Flood Zone 3 extent in accordance with Environment Agency guidance.

- Main Rivers
- 1% (1 in 100) annual probability of fluvial flooding in an undefended scenario
- 0.1% (1 in 1000) annual probability of fluvial flooding in an undefended scenario

The fluvial flood extents shown are the undefended hydraulic model results for the River Wye undertaken by the EA in 2012. This data has not yet been incorporated into the EA's Flood Map for Planning and therefore this mapping is a supplement to the EA's Flood Map for Planning.

Disclaimer: Not all flood incidents have been recorded and this map is based on the available data at the time. Herefordshire Council flood reports are mapped to an anonymous point on or near the street where the event happened.

Entries on the Welsh Water flood register are plotted to the nearest OS grid.

Welsh Water undertake improvements to the network to eliminate the identified risk.

Welsh Water and Herefordshire Council data were updated in December 2018.
