

## Cutting Practice

Hedgehogs have very strong claws, it allows them to dig and climb as needed. Their front paws have 5 toes whereas the back only have 4.

Can you practise your cutting skills by using scissors to help Spike get to his food? If you don't feel like cutting, use a pencil, crayon or a pen to get to the food!

### **FUN FACTS!**

Not all hedgehogs hibernate!

Hedgehogs are wide ranging and some hedgehog species live in warm climates. These hedgehogs don't need to hibernate as the weather stays a comfortable temperature and there is plenty of food found all year round.
