

Herefordshire Council's EV Strategy Roadmap

2013

First electric vehicle (EV) charge points installed in council car parks

2014

Fleet review results in 12 electric / hybrid pool cars for council staff use

2016

bpChargemaster take over car park charge points and replace with new chargers

2021

First rapid charge points (50kW) installed in council car parks

2022

New contract with Wenea for the expansion of charge points in council car parks.

2023

Worked with a consortium of local authorities and Midlands Connect to win a bid for Local Electric Vehicle Infrastructure (LEVI) pilot funding for on-street charge points.

2024

- Council enters into a contract for the provision of the first on-street charge points in the county under the LEVI pilot scheme.
- Council adopts EV Strategy.

Ongoing Actions

- Working with a consortium of local authorities and Midlands Connect to deliver more on-street charge points.
- Working with businesses to support the switch to EV.
- Updating the public on EV developments via the council's webpages and EV Drivers group.
- Consulting with residents and other stakeholders on the location of on-street charge points.

Future opportunities

- Increase provision and use of council electric pool cars and vans
- Identify opportunities to switch the delivery of council services to EV
- Work with stakeholders to support their switch to EV / access funding
- Run public engagement events to support the switch to EV
- Identify further opportunities to support residents and businesses switch to EV
